speed number and multiple factors and how to fight cancer by using a two way optimization methodology those three terms and optimization method are not mentioned in medical books cancer research articles and are not part of the language used in hospitals our simulation and our kinetic studies show that both cancer development and reversal processes would take many years the rates of reversals for cancer and all chronic diseases are so slow that medicine cannot accurately evaluate this is why medicine cannot recognize or refuses to acknowledge any cure that requires half a year to several years to accomplish the approach we use in this book is directly in conflict with three core concepts in medicine dualism reductionism and population based approach moreover we found that medical treatments can partially neutralize and totally nullify the curative benefits of our optimization method based on our own findings and the results from reanalyzing massive existing medical publications we inevitably found that medical treatments are primarily responsible for creating the cancer panic and the treatments shorten lives in a super majority of cases we try to analyze every issue in the most comprehensive way our analysis covers medical model and its legal framework leading cancer theories treatment development histories formation of standard of care control selections in drug trials the massive cancer controversies and mountains of actual performance data the most convincing evidence is the performance verdicts by recent medical studies and latest meta reviews we try to built a watertight case that precludes any of those arguments that have been made by proponents of the reductionist medical model
