india brief history of a civilization provides a brief overview of a very long period allowing students to acquire a mental map of the entire history of indian civilization in a short book most comprehensive histories devote a few chapters to the early history of india and an increasing number of pages to the more recent period giving an impression that early history is mere background and that indian civilization finds its fulfillment in the nation state thomas r trautmann believes that the deep past lives on and is a valuable resource for understanding the present day and for creating a viable future the result is a book that is short enough to read in a few sittings but comprehensive in coverage 5 000 years of india in brief

british rule of india brought together two very different traditions of scholarship about language whose conjuncture led to several intellectual breakthroughs of lasting value two of these were especially important the conceptualization of the indo european language family by sir william jones at calcutta in 1786 proposing that sanskrit is related to persian and languages of europe and the conceptualization of the dravidian language family of south india by f w ellis at madras in 1816 the dravidian proof showing that the languages of south india are related to one another but are not derived from sanskrit these concepts are valid still today centuries later this book continues the examination thomas r trautmann began in aryaans and

british india 1997 while the previous book focused on calcutta and jones the current volume examines these developments from the vantage of madras focusing on ellis collector of madras and the indian scholars with whom he worked at the college of fort st george making use of the rich colonial record trautmann concludes by showing how elements of the indian analysis of language have been folded into historical linguistics and continue in the present as unseen but nevertheless living elements of the modern

this book comprehensively surveys and critically analyses gandhi s ideas on caste and untouchability it emphasizes the fact that gandhi was a considerable thinker who had seminal ideas on the caste question as an intellectual history this book is not just a study of his ideas but also of what he practised it narrates his lifelong struggle against untouchability since his south african days and focuses on his distinctive understanding of the caste question which differed sharply from that of his contemporaries both on the right and the left the book also critically analyses and questions the attribution of strategy to gandhi with regard to both the nationalist and anti untouchability movements the volume will be of great interest to scholars and researchers of history caste and discrimination studies and south asian studies
